ARN Professional Lobbies Moderation Handbook

ARN Admin Team, Revision 1.0, Publication - 3/17/2026, Last Updated - 3/17/2026

This handbook will serve as a guideline for all current and future moderators on the ARN moderation team. This handbook should be studied and used as a reference to ensure consistency and fairness in the ARN Discord server. This handbook will outline expectations, procedures, and best practices for all moderators. You are expected to follow this guide when making decisions and interacting with the community.[penis]

1 - Introduction

1.1 - Purpose of the handbook

This handbook is the official guide for all ARN Discord moderators. It defines standards, responsibilities, and procedures to ensure consistent, fair, and effective moderation. Moderators are expected to use this document as a reference when making decisions and handling situations within the server.

This handbook is not exhaustive for every possible scenario, but it provides a clear framework to guide judgment and maintain consistency across the moderation team.

1.2 - Moderator Objectives

The moderation team is responsible for maintaining a safe, respectful, and organized community. Core objectives include enforcing rules, preventing disruptive behavior, and responding to incidents efficiently while supporting overall server stability. Moderators are also expected to promote a positive environment, not just enforce rules, by encouraging respectful interaction and minimizing unnecessary conflict.

1.3 - Scope of Authority

Moderators are granted permissions to enforce rules through actions such as warnings, timeouts, and bans. These powers must be used responsibly, without bias, and strictly in accordance with the guidelines of this handbook. Moderators should avoid over-enforcement or unnecessary punishment and instead aim for appropriate, proportional responses. Situations beyond standard handling or involving higher risk should be escalated to higher staff.

2 - Roles, Permissions, and Structure

2.1 - Staff Roles and Hierarchy

The ARN Discord operates on a structured hierarchy to ensure clear authority and accountability. Core moderation leadership consists of **Owner**, **Head Admin**, **Admin**, and **Moderator** in said order.

Authority flows from top to bottom. Higher roles handle escalations, final decisions, and policy direction, while Moderators focus on day-to-day enforcement. All staff are expected to respect this chain of command.

2.2 - Discord Role Permissions

Permissions are assigned based on role and determined by moderation capabilities (e.g., managing messages, timeouts, bans). Only designated moderation roles (Admin, Moderator, and above) are authorized to enforce rules.

Any other roles are not moderation roles (e.g., ATC, Pilot ranks, Staff Team)unless explicitly granted permissions. Moderators must operate strictly within their assigned permissions and must not bypass role limitations or misuse tools.

2.3 - Moderator Code of Conduct

Moderators are expected to act professionally, remain impartial, and enforce rules consistently. Personal bias, favoritism, or retaliation is not permitted.

Moderators must:

- Treat all members fairly, regardless of rank
- Keep internal matters confidential
- Use moderation powers only when justified

Failure to follow these standards may result in the removal of permissions and further disciplinary action.

3 - Server Rules and Enforcement

3.1 - Rule Overview

All members are expected to follow these rules at all times. These rules apply across all channels, including text, voice, usernames, profiles, and direct interactions within the server.

1. Respect All Members

- No harassment, bullying, or targeted insults
- No discrimination (racism, sexism, homophobia, etc.)
- Heated discussions are allowed, but personal attacks are not

2. No Spam or Channel Misuse

- Do not flood messages, spam reactions, or send repeated content
- Use channels for their intended purpose
- Excessive caps, ping spam, or noise in voice channels is not allowed

3. No NSFW or Inappropriate Content

- No explicit, sexual, or highly inappropriate content
- No suggestive usernames, profile pictures, or links
- Keep content suitable for a general audience

4. No Trolling or Disruptive Behavior

- Do not intentionally provoke arguments or derail conversations
- No baiting, mic spamming, or repeated disruption in voice channels
- Follow the moderator's instructions when given

5. No Scams, Advertising, or Self-Promotion

- No phishing links, scams, or malicious content
- No advertising without permission
- No unsolicited self-promotion or DM advertising

6. No Impersonation or Misleading Behavior

- Do not impersonate staff or other members
- Do not spread false or misleading information intentionally

7. Follow Discord Terms of Service

- Any violation of Discord’s Terms of Service or Community Guidelines is prohibited
- This includes underage use, illegal content, or exploitative behavior

8. Respect Staff Decisions

- Do not argue with moderators in public channels
- If you disagree, use the proper appeal process
- Ignoring or repeatedly challenging staff may result in further action

9. Use Common Sense

- Not every situation can be listed
- If behavior is clearly disruptive, harmful, or inappropriate, it may still be acted on even if not explicitly stated

3.2 - Violation Categories

Violations are categorized to standardize enforcement:

- **Minor Violations:** Spam, off-topic use, mild disruption
- **Moderate Violations:** Repeated spam, harassment, trolling
- **Severe Violations:** Hate speech, scams, threats, NSFW content

Severity determines punishment level and escalation speed.

3.3 - Zero-Tolerance Policies

The following typically result in immediate severe action (often a ban):

- Hate speech or extreme harassment
- Credible threats or encouragement of harm
- Scamming, phishing, or malicious links
- Posting explicit NSFW content
- Impersonating staff with the intent to deceive

3.4 - Consistency and Fairness Standards

Moderators must enforce rules consistently. Similar actions should result in similar consequences.

When evaluating a situation, moderators should consider:

- Severity of the action
- Intent (malicious vs careless)
- Prior behavior/history

If uncertainty exists, moderators should consult an admin before acting.

4 - Punishment System

4.1 - Warning and Strike System

ARN uses a progressive punishment system supported by MEE6. Minor violations should typically begin with a warning, which should be logged using MEE6’s warning system when available.

Warnings should:

- Clearly state the rule violated
- Be logged for tracking repeat behavior (use the command, it's auto logged)
- Escalate if ignored

Moderators should check a user’s prior warnings before taking action. Repeated offenses should result in stronger punishments.

4.2 - Timeouts and Mutes

Timeouts are used when warnings are ignored or behavior becomes disruptive. These are applied through Discord's timeout feature or moderation bots when appropriate.

General guideline:

- First offense (minor/moderate): short timeout (use discretion)
- Repeated behavior: longer timeouts (use discretion)
- Continued disruption: escalate to kick or ban

Timeouts should always have a clear reason and, when possible, be logged via the logging channel.

4.3 - Kicks and Bans

- **Kicks** are used as a stronger warning or to immediately stop disruption
- **Temporary bans** are used for repeated or serious violations
- **Permanent bans** are used for severe or zero-tolerance violations

All bans should be logged and, when possible, include a reason visible to other moderators. MEE6 or other bots may be used to assist with logging and tracking.

4.4 - Handling Repeat Offenders

Moderators must review a user's history (via MEE6 logs or manual logs) before deciding on punishment. Repeated violations should result in faster escalation.

Moderators may skip steps in the system if:

- The user has a clear history of violations
- The behavior is intentionally disruptive
- Previous actions have failed to correct behavior

The goal is not to follow steps rigidly, but to stop ongoing disruption efficiently while remaining fair and consistent.

5 - Punishment System

5.1 - Identifying and Responding to Incidents

When an incident occurs, follow this sequence:

1. **Identify the issue**
   - Read the messages fully (not just one line)
   - Determine which rule is being broken
2. **Check context**
   - Look at previous messages in the channel
   - Determine if it’s a one-time issue or an ongoing behavior
3. **Check user history**
   - Use MEE6 or logs to see prior warnings/actions
4. **Decide severity**
   - Minor → warning
   - Moderate → timeout
   - Severe → kick/ban

If the situation is actively disruptive (spam, arguments, raids), stop the behavior first (timeout/delete messages), then review.

5.2 - Evidence Collection (Messages Links, Screenshots, Logs)

All actions should be backed by clear evidence. Preferred forms include:

- Message links (most reliable)
- Screenshots (if content is deleted)
- MEE6 logs or Discord audit logs

Evidence is required for accountability and appeals. Moderators should not issue serious punishments without sufficient proof unless immediate action is necessary to stop harm.

5.3 - Issuing Punishments via Discord Tools/Bots

A. Warning (via MEE6)

1. Use the command:
   - `!warn @user reason` *(or your server's equivalent)*
2. Clearly state the rule in the reason
   - Example: `!warn @user Spam / flooding chat`
3. Optionally send a message in chat:
   "Please stop spamming. This is your warning."

B. Timeout (Mute)

Using Discord timeout:

1. Right-click the user
2. Click **"Timeout"**
3. Select duration (e.g., 5m, 10m, 1h)
4. Enter a reason

When to use:

- Ignored warnings
- Ongoing disruption
- Arguments getting out of control

C. Kick

1. Right-click the user
2. Click **"Kick"**
3. Enter a clear reason

Use for:

- Immediate disruption
- Situations where removal may reset behavior

D. Ban

1. Right-click the user
2. Click **"Ban"**
3. Select message deletion timeframe if needed
4. Enter a detailed reason

Use for:

- Severe violations
- Scams, NSFW, threats
- Repeated offenses after prior actions

5.4 - Case Logging and Notes

After taking action:

1. **Post in mod-log channel:**
   Include:
   - User (mention + ID if possible)
   - Victim(s)
   - Reason
   - Notes
   - Previous Moderation Action
   - Action Taken
   - Proof (images, message links)

Example log:

User: Mop_Bo <@!619881602587295745>
Victim(s): Bugg <@!1261350460623818843?
Reason: Mop called bug a meanie
Notes: Mop was very correct
PrevAction: Mop does not like bug
Proof: mop **-** "FUCK YOU BUG."

- If the user already has multiple warnings, note that for future moderators

6 - Communication Guidelines

6.1 - Interacting with Members

Moderators must communicate clearly, directly, and respectfully at all times. The goal is to correct behavior, not escalate situations.

Guidelines:

- State what the user did wrong and what they need to do instead
- Keep messages short and direct
- Do not insult, mock, or argue with users
- Avoid sarcasm or unclear tone

Example (good):
"Please stop spamming. Continued behavior will result in a timeout."

Example (bad):
"Dude, stop, you're being annoying." 🤓

6.2 - De-escalation and Conflict Handling

When situations become heated, moderators are responsible for lowering tension, not contributing to it. ← This is a big one!

Steps to de-escalate:

1. Step in early before arguments grow

2. Give a clear instruction ("Drop the argument and move on")

3. If ignored, apply a timeout rather than continuing the argument

4. Avoid back-and-forth debates with users

If multiple users are involved, address the situation broadly instead of targeting one person unless clearly necessary.

6.3 - Internal Staff Communication

Moderators must coordinate with each other to maintain consistency.

Guidelines:

- Use designated staff channels for discussion
- Inform other moderators of ongoing situations
- Ask for input if unsure about a decision
- Do not contradict another moderator publicly

If a moderator disagrees with an action, it should be discussed privately in staff channels, not in front of users.

6.4 - Professionalism and Authority

Moderators represent the server and must maintain a professional tone when acting in a moderation capacity.

- Do not use moderation powers in anger
- Do not engage in personal conflicts while moderating
- Separate casual participation from moderation actions

When issuing actions, moderators should be firm and neutral, not emotional or aggressive.

7 - Reports and Appeals

7.1 - Handling User Reports

Moderators are responsible for reviewing and acting on reports submitted by members. All reports should be treated seriously and handled promptly. The general process is as follows:

1. **Acknowledge the report**
    - Confirm receipt with the reporting member if necessary.
    - Thank them for providing information without making promises about outcomes.

2. **Review the report**
    - Examine all evidence provided (screenshots, message links, context).
    - Check previous moderation logs or MEE6 history for related incidents.
    - Determine the validity of the report before taking action.

3. **Investigate context**
    - Review surrounding messages or interactions.
    - Determine whether the behavior is ongoing or isolated.
    - Identify if multiple members are involved or affected.

4. **Take appropriate action**
    - Apply warnings, timeouts, kicks, or bans as dictated by the severity and the punishment system.
    - If unsure about the correct action, escalate to an Admin or Head Admin for guidance.

5. **Document the incident**
    - Log the report, investigation notes, and any actions taken in the mod-log channel.
    - Include links to evidence and reference any prior warnings or violations.

7.2 - Prioritization of Reports

Not all reports require the same level of urgency. Moderators should triage reports based on the following:

- **High Priority**
  - Threats of self-harm, harm to others, or harassment campaigns.
  - Scams, phishing attempts, or impersonation of staff.
  - NSFW or illegal content.
- **Medium Priority**
  - Repeated spam, trolling, or disruptive behavior.
  - Personal disputes escalating toward public arguments.
- **Low Priority**
  - Minor rule violations that have already been addressed by previous warnings.
  - Misuse of channels that is not disruptive.

High-priority reports must be addressed immediately, even if other moderation tasks are in progress. Low-priority reports may be reviewed during regular moderation cycles, but no report should be ignored.

7.3 - Appeals Process

Members have the right to appeal moderation actions they believe were unfair or incorrect. Moderators must handle appeals professionally and transparently:

1. **Receive the appeal**
    - Appeals should be submitted in the designated channel or via direct message to staff.
    - Ensure the member clearly states the action being appealed and their reasoning.
2. **Review the case**
    - Examine the original incident, logs, and evidence.
    - Check prior behavior and history for context.
    - Consider whether the correct rules and escalation steps were followed.
3. **Decision-making**
    - Decide whether to uphold, reduce, or revoke the punishment.
    - Consult with an Admin or Head Admin if unsure or if the appeal involves a high-severity action.
4. **Communicate outcome**
    - Respond to the member respectfully and clearly.
    - Provide a concise explanation of the decision, referencing the rules or evidence if necessary.
      Maintain records of all appeals in the mod-log channel for transparency and accountability.

7.4 - Escalation to Admins

Certain situations or reports may require escalation to higher-level staff:

- **When to escalate**
  - The report involves complex situations or multiple parties.
  - The moderator is unsure of the proper rule application or severity.
  - The member is a repeat offender with a history of ignoring punishments.
  - High-risk incidents (NSFW content, threats, scams) that require immediate admin intervention.
- **How to escalate**
  - Use the designated admin/staff channels.
  - Provide a full summary of the situation, evidence links, prior actions taken, and suggested next steps.
  - Await admin guidance before applying further action unless immediate action is required to prevent harm.

Moderators must remember that escalation is a tool to maintain consistency and safety, not a sign of incompetence. Proper escalation protects both members and staff from mistakes or biased decisions.

8 - Moderation Tools and Systems

8.1 - Mee6 and built-in Features

Moderators rely primarily on **MEE6** and Discord's native tools to enforce rules, track actions, and maintain order. Understanding how to use these effectively is essential.

MEE6 Functions:

- **Warnings & Strikes** – Record member infractions and track repeated violations automatically.
- **Timeouts & Mutes** – Temporarily restrict member participation in text channels (via Discord timeout integration).
- **Logging** – Automatically logs warnings, bans, kicks, and message deletions.
- **Commands** – Use commands like `!warn`, `!mute`, `!kick`, or `!ban` to apply actions while generating evidence for the logs.

Built-in Discord Features:

- **Timeouts** – Temporarily restrict user participation in text and voice channels.
- **Kicks & Bans** – Remove disruptive members immediately.
- **Audit Logs** – Track all staff actions, role changes, and channel modifications.
- **Channel & Role Permissions** – Control access to sensitive channels or moderation functions.

Best Practices:

- Double-check MEE6 actions for accuracy before assuming they are correct.
- Use both MEE6 and Discord audit logs for evidence collection when investigating incidents or appeals.
- Apply moderation powers consistently and proportionally, as outlined in the punishment system.
- Avoid using commands for personal disputes or outside the scope of server rules.

8.2 - Discord Features(Roles, Channels, Permissions)

Moderators must utilize Discord's roles and channels effectively to maintain structure and clarity.

Channels:

- Keep staff communication, mod-logs, and report-handling channels separate from public channels.
- Sensitive discussions and escalations must always occur in staff-only channels.
- Redirect members from public disputes to proper channels or staff DMs.

Additional Tools:

- **Pinned Messages** – Use to display rules or important announcements in public channels.
- **Slowmode** – Temporarily limit messaging frequency in heated or high-traffic channels.
- **Channel-specific Restrictions** – Use role/channel permissions to prevent repeated disruption.

8.3 - Logs and Audit Trail Usage

Accurate record-keeping ensures accountability and consistency.

Types of Logs:

- **MEE6 Logs** – Warnings, strikes, kicks, bans, and message deletions.
- **Discord Audit Logs** – Track role changes, bans, kicks, and channel adjustments.
- **Manual Notes** – Used for incidents requiring context beyond what MEE6 logs provide.

Guidelines:

- Include evidence links when logging actions (message links, screenshots, timestamps).
- Reference prior warnings or punishments when acting on repeat offenders.
- Use logs to support appeals or escalations to Admins.
- Maintain log confidentiality; do not share staff notes publicly.

Best Practices:

- Review recent logs regularly to stay aware of ongoing issues.
- Keep logs clear, concise, and professional.
- Ensure all logged actions include user mention, reason, and any relevant context.

9 - Activity and Accountability

9.1 - Activity Expectations

Moderators are expected to remain **active, engaged, and responsive** within the ARN Discord server. Activity ensures rules are enforced promptly, incidents are addressed quickly, and the community remains safe. (It's not a full-time job, just do what you can)Otherwise, what are we paying you for? :D sucker

Minimum Activity Guidelines:

- Log in daily or at least frequently enough to monitor active channels.
- Respond to reports, messages, or incidents promptly.
- Participate in staff discussions and updates in staff-only channels.
- Monitor high-traffic channels and assist with ongoing conflicts or rule enforcement.

Best Practices:

- Set notifications for key channels (mod-log, reports, staff-chat) to remain aware of incidents.
- Rotate coverage for busy hours to ensure at least one active moderator is present.
- Inform other moderators if you will be unavailable for extended periods.

9.2 - Staff Performance and Conduct Review

Regular review of moderator performance ensures the team maintains professionalism, fairness, and consistency.

Performance Review Factors:

- **Responsiveness:** Timely handling of reports, warnings, and incidents.
- **Consistency:** Following punishment and enforcement guidelines consistently.
- **Professionalism:** Clear, neutral communication with members and staff.
- **Teamwork:** Coordinating with staff, escalating when appropriate, and supporting peers.
- **Documentation:** Proper use of MEE6 logs, audit logs, and manual notes.

Review Process:

- Admins may periodically review mod logs and activity to assess performance.
- Feedback will be provided in staff channels or privately via DM.
- Constructive suggestions or corrective guidance may be given to improve moderation quality.

9.3 - Inactivity and Removal Policy

Moderators who fail to maintain the expected activity level or violate conduct guidelines may face consequences, including removal from the moderation team.

Inactivity Guidelines:

- **Short-term inactivity:** Notify staff if unavailable for more than a few days (vacation, personal matters).
- **Extended inactivity:** No activity for **14 days without notification** may trigger a review.
- **Repeated inactivity:** Chronic inactivity may lead to temporary or permanent removal.

Removal Considerations:

- Consistent failure to follow handbook guidelines, abuse of powers, or lack of engagement.
- Decisions are made by Admins or Head Admins after reviewing logs and consulting with other staff.
- Removed moderators may appeal their removal following the standard appeal process if applicable.

Best Practices to Avoid Removal:

- Communicate availability clearly in staff channels.
- Maintain regular presence, even during light activity periods.
- Use your moderator powers responsibly and according to the handbook.

10 - High-Risk and Special Situations

Moderators must be prepared to handle incidents that pose **high risk to the server, members, or staff**, including raids, NSFW content, threats, or scams. These situations require **immediate attention, careful documentation, and appropriate escalation**.

10.1 - Raids and Spam Attacks

Raids or coordinated spam attacks can disrupt the server quickly. Moderators must act decisively:

Indicators of a raid:

- Sudden influx of new members posting spam.
- Coordinated disruptive messages or repeated tagging.
- Multiple accounts are behaving similarly within a short period.

Response Procedure:

1. Activate slowmode in affected channels.
2. Temporarily restrict new member permissions if needed.
3. Delete spam messages and apply warnings, timeouts, or bans as appropriate.
4. Record evidence using message links, screenshots, and MEE6 logs.
5. Notify Admins immediately if the raid is severe or ongoing.

Prevention Tips:

- Use moderation bots and built-in verification settings to filter new accounts.

- Monitor join spikes and consider temporary server lockdowns in extreme cases.

10.2 - NSFW or Illegal Content

Posting explicit, illegal, or highly inappropriate content is **zero-tolerance** and requires immediate action.

Response Procedure:

1. Remove the offending content immediately.
2. Apply appropriate punishment (ban for zero-tolerance violations).
3. Collect evidence (screenshots, message links, audit logs).
4. Escalate to Admins for further action if needed.
5. Notify staff of the incident in the staff-only channel.

Important Notes:

- NSFW content may also violate Discord’s Terms of Service.
- Never ignore illegal content, even if posted by trusted members.

10.3 - Threats, Self-Harm, or Crisis Situations

Moderators may encounter members expressing threats toward themselves or others. These require **urgent and careful handling**:

Response Procedure:

1. Take threats seriously; do not dismiss or assume it is a joke.
2. Immediately alert Admins or Head Admins.

3. Apply timeouts, mutes, or bans if necessary to prevent escalation.

4. Collect evidence for future reference.

5. If there is a credible risk of harm, advise the member to contact appropriate authorities or support services.

Examples of Actions:

- Direct members to trusted crisis hotlines or Discord-supported mental health resources.

- Avoid attempting to counsel or personally resolve mental health crises.

10.4 - Scams. Phishing and Impersonation

Attempts to steal information, scam members, or impersonate staff are **serious violations** and must be handled immediately.

Response Procedure:

1. Remove any scam, phishing links, or malicious content.

2. Apply punishment (ban or timeout, depending on severity).

3. Document all evidence (screenshots, links, message history).

4. Notify Admins for escalation or server-wide warnings if multiple members are targeted.

5. Educate affected members if appropriate, without public shaming.

Impersonation Guidelines:

- Any member pretending to be staff to deceive others should be banned immediately.

- Evidence must be collected to verify intent.

11 - Appendix

The appendix provides quick-reference tools and resources for moderators to use during everyday moderation tasks. This includes a **punishment reference chart, standard response templates, and common MEE6/Discord commands.**

11.1 - Punishment Reference Chart

Violation Type	Example	Recommended Action	Notes
Minor	Spam, off-topic, minor trolling	Warning (via MEE6)	Escalate if repeated
Moderate	Repeated spam, harassment, and mild trolling	Timeout / Short mute (5–30 min)	Check prior warnings
Severe	Hate speech, threats, NSFW content, scams	Kick or Ban	Immediate escalation; collect evidence
Zero-Tolerance	Scams, phishing, extreme harassment, impersonation, and illegal content	Permanent Ban	Always log and escalate to Admins

Guidelines:

- Consider user's history before escalating punishment.
- Severity and intent determine the appropriate action.

- Immediate disruptive behavior may bypass standard escalation steps.

11.2 - Standard Response Templates (Warnings, Bans, Tickets)

Warnings (Text Example):

> "Please stop [behavior]. This is your official warning. Continued violations may result in a timeout or ban. Rule reference: [rule number/name]."

Timeout / Mute Notification:

> "You have been placed in a [X-minute] timeout for [reason]. Please review the rules to avoid further action. Evidence has been logged."

Kick Notification:

> "You have been removed from the server for [reason]. Re-entry may require approval from Admins. Evidence of the violation has been logged."

Ban Notification:

> "You have been permanently banned from the server due to [reason]. Appeals may be submitted via [appeal process link or method]. All actions are logged."

Appeal Response Template:

> "Your appeal regarding [action] has been reviewed. After evaluating the evidence and context, we have decided to [uphold/reduce/revoke] the action. Please review the rules to avoid future violations."

11.3 - Common Bot Commands

MEE6 Commands:

- `!warn @user [reason]` – Issue a warning to a member.
- `!mute @user [duration] [reason]` – Temporarily mute a member.
- `!kick @user [reason]` – Kick a member from the server.
- `!ban @user [reason]` – Ban a member from the server.
- `!warnings @user` – View a member's warning history.

Discord Built-in Features:

- **Timeout:** Right-click user → Timeout → Select duration → Enter reason.
- **Kick:** Right-click user → Kick → Enter reason.
- **Ban:** Right-click user → Ban → Select message deletion timeframe → Enter reason.
- **Audit Logs:** Server Settings → Audit Log → Filter by action type, date, or staff.
- **Slowmode:** Channel Settings → Overview → Adjust message interval.
- **Permissions:** Channel Settings → Permissions → Adjust roles for access and actions.

Best Practices:

- Always include a clear reason for moderation actions.
- Link evidence in logs whenever issuing punishments.

- Only authorized roles (Moderator, Admin, Head Admin) should execute moderation commands.

Acknowledgements & Closing

Thank you for taking the time to read and understand this handbook.

Being a moderator is both a **responsible and impactful role**. Your efforts help maintain a safe, welcoming, and enjoyable community for all members of ARN.

Remember:

- Follow these guidelines consistently.
- Act with fairness, professionalism, and integrity.
- Communicate and coordinate with your fellow staff members.

Your dedication as a moderator makes a difference. Together, we ensure that ARN remains a **positive, respectful, and thriving community**.

Signed:
MopBo
